

New Hampshire Sports-Neuropsychologists

The use of neuropsychological tests for identification and management of sports-related concussions is a recommended practice by the International Consensus on Sports Related Concussions (Zurich, 2008), and the NH Consensus on Sports Concussions (2011). Those documents further recommend that the interpretation of neuropsychological tests should be made by qualified neuropsychologists. The following are qualified neuropsychologists in New Hampshire.

Art Maerlender, PhD
